Subject: Beverly, USM Conf call tomorrow
Date: Monday, June 18, 2018 4:33:04 PM

Hi Carolyn,

Yes, I will be on the conference call. Yes, we can have a discussion. I discussed this with Steve Johnson, and he indicated that since the data supports that vapor intrusion appears to be occurring, MassDEP's position is that, consistent with our guidance, we recommend that the CEP be eliminated to the extent feasible.

Jack

Subject: USM meeting tomorrow

Jack, would you be available for the USM call tomorrow at 11 am? Did you get an invite from Craig Zaidy? Could we chat tomorrow morning before the call? Sorry if this is all last minute.

I think the most critical thing I need from you at this point is whether or not the state concurs on the CEP pathway (i.e., should they be looking at remediation, mitigation in one or two of these day care spaces)?

I am still a little leery about what exactly goes into the school versus residential ShortForms. In addition to exposure time, my risk assessor says we should also be looking at body weight and respiration rate, maybe. I am very close to figuring out how to see the parameters that go into this but because of the use of macros, it's not obvious. Cummings said they would use the residential forms in their work plan.

Thanks
Carolyn
